PANACAST 20
Engineered for intelligent AI-enabled personal video conferencing

Personal video. Reinvented.
—

Experience the next generation of intelligent, secure, portable video collaboration with Jabra PanaCast 20. This premium personal video conferencing device utilizes cutting-edge technology to deliver an experience that's intelligent, powerful, and completely unique; PanaCast 20 is personal video conferencing, completely reinvented.

Picture perfect. Wherever you work.
—

Our innovative technology uses advanced processors, powerful on-board AI and a premium 13-megapixel camera to deliver a real-time 4K Ultra-HD image that's sharp and crystal-clear, with virtually no latency. So you can start that big presentation knowing you (and whatever you're presenting) will look your best.

Are you ready for your close-up?
—

Being seen clearly makes all the difference. Our intuitive AI-driven Intelligent Zoom automatically follows your movements, perfectly framing you, whatever you're doing. Using a powerful on-board AI processor, Intelligent Zoom intuitively adjusts your picture in real time, ensuring you're always in the center of the frame, so you don't have to stay rooted to the spot.

Lightyears ahead.
—

With PanaCast 20, almost any light is good light. Intelligent Lighting Optimization analyzes your environment, and automatically adjusts your image in real time, to enhance the video quality, including in rooms where the light is poorly distributed.

Two streams are better than one.
—

Our unique Picture-in-Picture mode uses powerful Edge AI processing to combine two real-time video streams into one, displaying the second stream in an integrated window within your main image. Picture-in-Picture mode works with any UC platform, even if they don't support dual-stream devices, helping you to make your presentations more impactful.

Collaborate in confidence.
—

Worried about security when working remotely? With PanaCast 20, you don't need to be. This intelligent personal camera is engineered for data security. A powerful Edge AI processor drives all of the intelligent features of PanaCast 20, which means everything happens on the device itself. This reduces the risk of a data breach, so you can get on with whatever you're doing, without worrying.

Share what's good. Hide what's not.
—

We can't all be camera-ready all the time. Thankfully, PanaCast 20 features an integrated privacy cover, to give you total control. Simply slide the intuitive cover across your camera lens when you need privacy, and slide it back when you're ready to turn your video on.

Seamless UC connectivity.
—

PanaCast 20 works with all leading UC platforms so you can connect easily, whatever platform or systems you're using.

Engineered for the future.
—

PanaCast 20 will receive regular software updates throughout the product's lifespan to enhance the experience, update the feature set, and ensure you continue to get the most from your investment.
Partner with Jabra audio solutions.
—

PanaCast 20 works seamlessly with Jabra professional-grade audio solution. Choose from our industry leading range of headsets and speakerphones including Jabra Evolve2 65 and Speak 750.
